

Silicon Valley Code Camp for Kids 2015

Software Requirement

Build your first social app using Twitter Instagram and more with AppStudio

Instructor: Christine Matheney, Microsoft

Prior to coming: Please sign up for a Microsoft account with your child and provide them the username and password. This will make it easy for them to save their work and share it with you when they get home. <http://signup.live.com>

Software:

A web browser on your favorite device (tablet or computer is recommended)

Please make sure you can access <http://appstudio.windows.com/en-us>

Hardware:

Any device that can connect to the internet. Tablets and computers are recommended, but a smartphone will work if necessary.

If you have a Windows 8 or 10 device, that will provide an optimal experience.

NOTE: We can use any platform to build our app, but at this point in time, they will only deploy onto windows devices. We will have loaners for the kids to try out their newly built apps on, if they don't have a windows device.
