Silicon Valley Code Camp, October 9th and 10th, 2010

Silicon Valley Code Camp at Foothill College is coming soon! Code Camp is a new type of community event where developers learn from fellow developers. All are welcome to attend and speak. Code Camps have been wildly successful; last year, over 1000 participants came to Silicon Valley Code Camp. This year, there are 75 Sessions currently listed, covering topics including .Net, Java, JavaScript, HTML5, Oracle, SharePoint, iPhone, Android, Scala, Ruby and many other hot technologies. Don't miss Silicon Valley Code Camp 2010! [read more...](#)

Silicon Valley Code Camp – THIS WEEKEND – October 3rd and 4th, 2009

Ahh, the Silicon Valley – some call it the home of the Internet BOOM!! Well that's not all its home to. This weekend the Silicon Valley is home to another code camp, simply titled the [Silicon Valley Code Camp!](#)

<http://discountaspnet.spaces.live.com/blog/cns!FC24ECAD565F3E2C!494.entry>

This code camp though is not a "one day and your done" code camp. On the contrary, this FREE code camp is unique in that it lasts ALL WEEKEND. That's right; you have 2 days to make it out to this FREE event. The Silicon Valley Code Camp will be held this Saturday, October 3rd, 2009 and this Sunday October 4th, 2009 at Foothill College in Los Altos, CA.

There is slated to be 150 sessions at this year's code camp covering over 75+ topics. Add to that there are already over 1,200 people registered for this year's code camp. So if you live or will be in the Silicon Valley area and are interested in networking with other developers and learning new skills (and in this tough economy, who isn't?), then you should make it out to the Silicon Valley Code Camp.

Silicon Valley Code Camp 4.0 -- Oct 3-4, 2009 - Silicon Valley Web Users Group

"...Please join me at the 4th annual [Silicon Valley Code Camp](#) [1] at Foothill College in Los Altos on October 3-4, 2009. It is shaping up to be even bigger and better than last year's event. Attendance is FREE, but space is limited. So, you do need to [register in advance](#) [2]. Sessions will range from informal chalk talks to presentations. There will be a mix of presenters, some experienced folks, for some it may be their first opportunity to speak in public. And we are expecting to see people from throughout the Northern California region and beyond...." --
Michael Van Riper SVWUG Leader

There are over 1100 people registered for the [Silicon Valley code camp](#) this year! Wow! That's a couple hundred more than last year. This is a free event people, so there's no excuse not to come out to Foothill college this year. And it's not all Microsoft technologies (of course not --we're in Silicon Valley for heaven's sake!) so there's a lot of variety of talks and a diverse crowd of developers to network with. And people are coming from all over. The [home page](#) has an interactive Virtual Earth map on it that shows how far attendees and speakers are coming from to attend. We have attendees coming from as far as New Jersey. Woah.

[Silicon Valley Code Camp 2008](#) is just one month away. There are plenty of Java sessions to be found on the camp program ([28 tagged](#) with Java so far), of course Groovy has its share too ([8 tagged](#) so far). Pay close attention to the first presenter on the Groovy list, uhu, that is Dr. Paul King as in co-author of GinA, as in Groovy team member, as in "what are you waiting for? don't miss the opportunity to learn from one of the most prolific contributors to the Groovy project, go register now!"
